

2017 PROFESSIONAL DEVELOPMENT SERIES FOR DENTISTS & TEAMS

## The Strengths of CEREC

LIVE PATIENT CERAMIC RECONSTRUCTION PROGRAM

# 85%

That's the percentage of patients who say they prefer single visit dentistry to traditional treatment.\* And the advantages are obvious: patients avoid impression material, receive fewer anesthetics and don't need a temporary.

\*Source: Exevia GmbH dental patient survey, November 2015

### Experience the power of CEREC innovation and workflow hands-on!

Come and learn 4 CEREC steps\* and make your patient's dream of single-visit dentistry possible.

#### STEP 1\*

##### SCANNING

Spare your patients the discomfort of a conventional impression tray. Use the CEREC Omnicam, a small powder-free color camera, for precise 3D images in natural color.

#### STEP 2\*

##### DESIGN

After analyzing the complete scan, the CEREC software generates outstanding restoration proposals. This takes you to the production stage faster. You benefit from the simple and visually appealing user interface.

#### STEP 3\*

##### PRODUCTION

The CEREC grinding and milling unit and software are optimally synchronized with one another. The milling cycle for the previously designed full zirconia restoration is extremely precise, giving restorations smooth surfaces and margins and very fine fissures.

#### STEP 4\*

##### SINTERING & GLAZING

Full zirconia restorations are sintered and glazed chairside in the compact CEREC SpeedFire. The induction technology allows unmatched short sintering and firing times of typically 10-15 minutes.

Learn from the best how to be your best!

#### Dr. Raj Dhiman,

BSc (PHARM), DMD

Shortly after completing his Bachelors degree in Pharmaceutical Sciences at UBC, Dr. Dhiman learned how to optimize health care for his patients working closely with medical doctors in a community pharmacy setting. He then returned to UBC to complete his Doctor of Dental Medicine. Now practicing in Ladner, he maintains a true family practice fulfilling his passion for making his patients look and feel amazing, while increasing their self confidence through oral health and facial esthetics. His advanced skills include: implantology, smile design, sedation, neuromuscular full mouth rehabilitation and computerized dentistry (CAD/CAM). Institutions for his professional development include: DOCS education, BITES Institute, British Columbia Institute of Oral Implantology, Vancouver Dental Education Centre, California Center for Advanced Dental Studies, Advanced training in Invisalign. Dr. Dhiman has served as a Clinical Instructor with the California Center for Advanced Dental Education, the Frontier Institute, VDEC, and the CEREC ACCEPT program. In his family life, Dr. Dhiman and his wife enjoy teaching their three young children to play full-out and live their lives with passion!
