Imagine a team who has maximized their potential and perform at optimal levels. They are a cooperative, cohesive group who are working towards a common vision. We are better together combining strengths then working alone.

Lisa will be presenting "The Ultimate Synergistic Team"

Meet Moura Quayle - Director pro tem, UBC School of Public Policy and Global Affairs, Faculty of Arts Professor, Sauder School of Business

We are all leaders - in our families, communities, workplaces and beyond. Really great leaders aspire to manage "by design" - with a sense of purpose and foresight. But too few of us incorporate the proven practices and principles of the design disciplines. Lessons learned from the world of design, when applied to management, can turn leaders into collaborative, creative, deliberate, and accountable visionaries. Strategic design loosens the mind and activates innovation. It creates the conditions for employers and employees to thrive and for all kinds of businesses to succeed. This session will introduce you to practical techniques and ways of thinking to enhance your capacity for leadership on all fronts. You'll take away some tools that you can utilize immediately in your workplaces.

Moura will be presenting "Designed Leadership"
